

MANUAL TESTING SCRIPT

OodelCX Launch QA Checklist

107 tests with the exact result that counts as a pass. Tick every box, then decide whether to launch.

QA Checklist · October 2026

Written from the application code on the `main` branch. No screenshots are used.

Contents

1. A. Marketing site — 8 tests
2. B. Sign-in, roles and access — 6 tests
3. C. Surveys and the public form — 10 tests
4. D. Responses and cases — 8 tests
5. E. Alerts — 4 tests
6. F. Escalation — 8 tests
7. G. Playbooks, Decision Log and Initiatives — 5 tests
8. H. CX Pulse, Compass, Evidence Fusion and REACH — 8 tests
9. I. Highlights, Business Value, Program Evaluation, Attention Centre — 6 tests
10. J. Group portal — 8 tests
11. K. Colleague X (staff survey) — 9 tests
12. L. Billing (use Stripe test mode) — 6 tests
13. M. Admin portal — 12 tests
14. N. Operations and setup — 6 tests
15. O. Mobile and tablet — 3 tests

How to use this document

This is the manual test script for launch. It has **107 tests**, of which **67 are Core**. Core tests must pass before you show the product to a client. Check tests matter but will not stop a launch on their own.

1. Use staging. Use Stripe test mode. Use addresses ending `.test`.
2. Seed the demo data first: Admin > Dev Data Tools > Seed showcase data (or Add launch demo layer on top of existing data). Ask before wiping anything.
3. Do each test in the order shown. Tick the box only if the Pass line happens exactly.
4. If a test fails, write the test number and what you saw. Send that list back; I will fix it on `main`.

What this script cannot prove. The code has been checked by typecheck, the production build and 70 automated tests, but the screens have not been clicked through on staging by me. Your results are the proof.

Core passed: ____ / 67

All passed: ____ / 107

Go to launch? Yes / No

Before you start: accounts to use

ROLE	LOGIN
Admin	admin.demo@oodelscore.com
Group owner (Meridian Bank Group)	owner.meridian@showcase.odel.test
Branch owner (Airport Road)	owner.meridianbankairportroad@showcase.odel.test
Standalone business (The Olive Table)	owner.olivetable@showcase.odel.test
Programme evaluation (Amani)	amani@showcase.odel.test

Showcase passwords are in DEMO-ACCOUNTS.md.

A. Marketing site

Test on a laptop and on a phone. Use the public address, not a logged-in session.

☐ A1 **Home page loads** Core

Do: Open the home page.

Pass: Hero, five-step loop, two products, solutions and footer all show. No broken images.

☐ A2 **Customer X and Colleague X pages** Core

Do: Open both product pages and scroll to the end.

Pass: Five chapters (Capture, Clarify, Claim, Close, Confirm). Features include Compass, Highlights, Program Evaluation, Closing the Loop and Business Value. No mention of rosters, HR routing or day-30/exit surveys.

☐ A3 **No cut-off boxes on a phone** Core

Do: On a phone (about 400px wide) scroll the whole of Customer X.

Pass: Every chapter is one column, text above the picture. Nothing runs off the right edge. No sideways scrolling.

☐ A4 **Tablet footer** Check

Do: Open the footer at tablet width (about 800px).

Pass: Products, Solutions and Company sit side by side. No empty gaps.

☐ A5 **Pricing button** Core

Do: Look at the last call-to-action band on each page.

Pass: While Pricing is switched off in the menu, only 'Book a demo' shows. No 'See pricing' button.

☐ A6 **Demo request** Core

Do: Submit the demo form with a test address ending .test.

Pass: A thank-you message. The request appears in Admin under Contact messages.

☐ A7 **Solutions pages** Core

Do: Open each of the eight sector pages. On each, read the Colleague X side.

Pass: Text talks about answers going to the people you choose and one survey for every branch. It does not say 'sensitive routing', 'designated HR contact' or 'roster'.

☐ A8 **Cookie notice and policy links** Check

Do: Open Privacy policy and Terms from the footer.

Pass: Both load.

B. Sign-in, roles and access

Passwords for showcase logins are listed in DEMO-ACCOUNTS.md.

☐ B1 **Owner sign-in** Core

Do: Sign in as a business owner, then a group owner.

Pass: Each lands in the right portal. A wrong password shows a clear message.

☐ B2 **Password reset** Check

Do: Use 'forgot password' for a test account.

Pass: A reset email arrives (needs email set up). The link works once.

☐ B3 **Two-factor sign-in** Check

Do: Under Security, switch on two-factor with an authenticator app, sign out and in.

Pass: A six-digit code is asked for. Switching it off asks for the password.

☐ B4 **Branch head sees Customer X only** Core

Do: Sign in as a branch owner of a group.

Pass: No Customer/Colleague switch and no Colleague pages. Typing a staff page address sends you back to the dashboard.

☐ B5 **Restricted team member** Core

Do: Sign in as a team member who has a page switched off. Paste that page's address.

Pass: 'Access denied' page, not an empty page. The menu does not list it.

☐ B6 **Limited team member** Core

Do: Sign in as a limited-tier member.

Pass: Only 'My Cases', and only cases assigned to them.

C. Surveys and the public form

Use a standalone business such as The Olive Table.

☐ C1 **Create a draft** Core

Do: Feedback Points > build a survey > 'Save as draft'.

Pass: Survey appears with a 'Draft: not collecting yet' label. A link and QR code already exist.

☐ C2 **Draft link is closed** Core

Do: Open the draft's link in a private window.

Pass: The form says it is not collecting yet and accepts no answer.

☐ C3 **Publish** Core

Do: Press Publish on the draft, open the link again.

Pass: The form shows. Status changes to Live.

☐ C4 **Submit a response** Core

Do: Answer every question, including an open comment, and Send.

Pass: A thank-you. The response is under 'View responses' for that survey within a few seconds.

☐ C5 **Respondent details** Core

Do: Check the form's name, email and phone fields.

Pass: Always visible. Email says it is optional and invites an address for a reply. Age and gender follow the survey's setting.

☐ C6 **Close and reopen** Core

Do: Press Close, test the link, then Reopen.

Pass: Closed link refuses answers. Reopened link accepts them again.

☐ C7 **Click a survey to see responses** Core

Do: Click the response count on a survey.

Pass: Raw Feedback opens filtered to that survey.

☐ C8 **QR code and poster** Check

Do: Open the QR dialog and the printable poster.

Pass: A scannable QR and a clean poster page.

☐ C9 **Layouts** Check

Do: Submit once in 'all questions on one screen' and once in 'one per screen'.

Pass: Both work and give the same stored answers.

☐ C10 **Quota and event** Check

Do: Create a survey with a response quota of 2 and submit 3 times.

Pass: The third answer is refused and the survey shows closed.

D. Responses and cases

Customer X, any business with the Case Management page.

☐ D1 **Severe response opens a case** Core

Do: Submit a response with 1 star and a comment.

Pass: Raw Feedback shows 'Case opened. View it'. Case Management has a case with an owner, a due date and 'Raised by: System'.

☐ D2 **Daily cap** Core

Do: Submit more than five 1-star responses at one location in a day.

Pass: No more than five automatic cases appear for that location that day. The rest stay as responses.

☐ D3 **Make this a case** Core

Do: Open a 5-star response and press 'Make this a case'. Press it again.

Pass: One case is created, then the same case is shown. 'Raised by' shows your email.

☐ D4 **Case timeline** Core

Do: Open any case.

Pass: One timeline of every change, with who and when.

☐ D5 **Assign, change status, resolve** Core

Do: Assign an owner, change status, resolve with a note.

Pass: Each change is recorded. The resolved case appears in the Decision Log as a draft that needs confirming.

☐ D6 **Comments** Check

Do: Add a comment on a case.

Pass: It shows with your name and time.

☐ D7 **Filters** Check

Do: Use date and survey filters on Raw Feedback.

Pass: The list narrows correctly.

☐ D8 **Reply to the customer** Core

Do: On a case whose response has an email, send a reply.

Pass: Email is sent (needs email set up) and the reply is on the timeline. With no email on file, the page says why.

E. Alerts

Needs email set up for the delivery check.

☐ E1 **Create an alert rule** Core

Do: Alert Rules > add a rule with a limit that will fire, then submit a response.

Pass: An email reaches the rule's recipient. The rule itself creates no case.

☐ E2 **Cooldown** Check

Do: Submit another response within an hour.

Pass: No second email for the same rule.

☐ E3 **Alerts list** Check

Do: Open Alerts.

Pass: The fired alert is listed with time and rule.

☐ E4 **Group alert rules** Check

Do: As group owner, add a rule, and as a branch owner open Alert Rules.

Pass: Branch sees the rule only if the group has delegated it. Otherwise the page is not available.

F. Escalation

Use Meridian Bank - Airport Road after the launch demo layer is added.

☐ F1 **One button** Core

Do: Open Case Management and look at a case.

Pass: One 'Escalate' button, not two. 'Highest level reached' shows at the top level.

☐ F2 **Preview before you send** Core

Do: Press Escalate on a level-1 case.

Pass: A panel says which level it goes to, who holds it, and that they will be emailed. A note box is offered.

☐ F3 **Result is visible** Core

Do: Confirm the escalation.

Pass: A banner says who the case is now with. The owner and level on the card change.

☐ F4 **Full path** Core

Do: Open a seeded case that went team member, level 2, level 3.

Pass: 'Raised by' shows the originator. The timeline shows every move with who pressed the button, who received it, and the level.

☐ F5 **Step back** Core

Do: On a level-2 or higher case press 'Step back'.

Pass: The case returns one level, with a history line. Nothing is deleted.

☐ F6 **Nothing configured** Check

Do: Open a case in an account with only one level.

Pass: The panel explains that no further levels are set up.

☐ F7 **Auto-escalation** Check

Do: Set a short time limit and leave a case untouched (needs the scheduled job).

Pass: The case moves up on its own and the history says 'auto'.

☐ F8 **Group view** Check

Do: Open the same case from the group portal.

Pass: Group sees the same path and can add a comment.

G. Playbooks, Decision Log and Initiatives

☐ G1 **Playbook attaches** Core

Do: Open a case in a category with a playbook.

Pass: A playbook with a checklist shows and each step can be ticked.

☐ G2 **Decision log entry** Core

Do: Open the Decision Log.

Pass: Entries show owner, date and a before/after result once enough time has passed. Auto drafts say they need confirming.

☐ G3 **Confirm a draft** Check

Do: Confirm or edit an auto-drafted entry.

Pass: It becomes a normal entry.

☐ G4 **Initiative** Check

Do: Open Improvement Initiatives and add a note to one.

Pass: Cards open in a drawer. The note is saved.

☐ G5 **Recurring issue** Check

Do: Look for a recurring-issue flag on cases.

Pass: A flag offers to turn it into an initiative.

H. CX Pulse, Compass, Evidence Fusion and REACH

- ☐ H1 **CX Pulse** Core
Do: Open CX Pulse.
Pass: A score, five parts, a ladder image and the trend.
- ☐ H2 **What would move you up** Core
Do: Under the ladder, read the new line.
Pass: It names the weakest Compass area and links to its recommendation.
- ☐ H3 **Compass assessment** Core
Do: Retake Compass on an account with no assessment.
Pass: Six areas, answers saved as you go, a result with a stage (Established or Emerging).
- ☐ H4 **Evidence Fusion** Core
Do: On a completed assessment, scroll to Evidence Fusion.
Pass: Each area is tagged confirmed, overstated, understated or not enough data, with three indicators each.
- ☐ H5 **REACH cards** Core
Do: Scroll to 'What to do next'.
Pass: One card per weak or overstated area with Recognize, Elevate, Align, Connect and Habituate.
- ☐ H6 **Elevate by email** Core
Do: On a card pick a colleague and press 'Send by email'.
Pass: A confirmation message. The colleague receives the email (needs email set up).
- ☐ H7 **Connect link** Check
Do: Press the link on a card.
Pass: It opens the right screen, for example Category Owners.
- ☐ H8 **Retake history** Check
Do: Retake after the due date.
Pass: History shows earlier results with progress over time.

I. Highlights, Business Value, Program Evaluation, Attention Centre

☐ I1 **Highlights** Check

Do: Open Highlights.

Pass: Strong positive comments and themes from the last 90 days.

☐ I2 **Business Value** Core

Do: Enter average transaction value and visits per year.

Pass: The page shows value at stake in unresolved negative feedback and value resolved.

☐ I3 **Program Evaluation** Check

Do: On Amani, open Program Evaluation.

Pass: A training session shows its aims next to what feedback said, with matches and gaps.

☐ I4 **Attention Centre** Check

Do: Open Attention Centre.

Pass: Items needing action, grouped by kind, each linking to its case.

☐ I5 **Analytics** Core

Do: Open Analytics and change the period.

Pass: CSAT, CES, NPS, drivers, themes and trends update.

☐ I6 **Insights report** Core

Do: Open Insights.

Pass: Only reports an Admin has approved are shown.

J. Group portal

Use Meridian Bank Group.

☐ J1 **Overview and Command Center** Core

Do: Open both.

Pass: Network totals and one row per branch. Totals include every branch.

☐ J2 **Branches and Compare** Core

Do: Open Branches, then Compare branches.

Pass: Branch scores, ranks and trend. Clicking a branch opens it.

- ☐ J3 **Regions** Check
Do: Open a region.
Pass: Its branches and scores.

- ☐ J4 **Branch permissions** Core
Do: Switch a delegated area off for a branch.
Pass: That page disappears for the branch and the API refuses changes.

- ☐ J5 **Central survey** Core
Do: Build a survey from the group portal.
Pass: Branches are listed with tick boxes, all ticked by default.

- ☐ J6 **Group team members** Check
Do: Open Team Members.
Pass: Members visible. Adding or inviting is done by Admin.

- ☐ J7 **Category owners** Check
Do: Set a default owner for a category.
Pass: Branches without their own owner use it.

- ☐ J8 **Group billing** Check
Do: Open Billing.
Pass: Shows who pays for each branch.

K. Colleague X (staff survey)

Use a group that has Colleague X, as the group owner.

- ☐ K1 **Publish to branches** Core
Do: Build a staff survey and leave all branches ticked.
Pass: One survey per branch, each with its own link and QR code.

- ☐ K2 **Anonymity** Core
Do: Open a staff survey link.
Pass: No name, email or phone asked. The anonymity line shows. Age and gender are off by default.

☐ K3 **Group sees every response** Core

Do: Submit one answer on a branch link, then open Raw Feedback as group owner on Colleague.

Pass: The answer is there straight away.

☐ K4 **Branch under five** Core

Do: Look at a branch with fewer than five answers.

Pass: Its name and score are hidden. Its answers still count in the group total.

☐ K5 **Branch cannot see staff answers** Core

Do: Sign in as that branch's owner.

Pass: No staff pages at all.

☐ K6 **eNPS and Colleague Pulse** Core

Do: Open the staff dashboard.

Pass: eNPS, Colleague Pulse and themes show.

☐ K7 **Customer/Colleague switch** Check

Do: Switch products on a two-product account.

Pass: Everything changes to the other product and shows 'Switching...' while it loads. Time how long it takes and report it.

☐ K8 **No staff cases** Core

Do: Submit a very low staff answer.

Pass: No case is created.

☐ K9 **Edit the anonymity line** Check

Do: In Admin > Content, change the anonymity line and open a staff form.

Pass: The new wording shows.

L. Billing (use Stripe test mode)

Never use a real card.

☐ L1 **Checkout** Core

Do: Start checkout from Billing.

Pass: The Stripe page opens with the right amount and product.

☐ L2 **Double click** Core

Do: Press the checkout button twice or open it in two tabs.

Pass: Both land on the same Stripe page.

☐ L3 **Pay** Core

Do: Pay with the test card 4242 4242 4242 4242.

Pass: Subscription shows active once.

☐ L4 **Repeat event** Core

Do: Resend the event from the Stripe dashboard.

Pass: Nothing changes and no second subscription appears.

☐ L5 **Failed payment** Check

Do: Use a failing test card.

Pass: A clear banner says the payment failed.

☐ L6 **Group pays or branch pays** Check

Do: Check a branch with each setting.

Pass: The bill follows the setting.

M. Admin portal

Sign in as admin.demo@oodelscore.com.

☐ M1 **Overview and Command Center** Core

Do: Open both.

Pass: Headline numbers, needs-attention list and every client's health.

☐ M2 **Create an account** Core

Do: Create a test business with an owner.

Pass: Owner receives a welcome email. Status shows invite pending, then active.

☐ M3 **Team members** Core

Do: Add a team member to an account.

Pass: Seat limits are enforced. Page restrictions can be set per person.

☐ M4 **Feature switches** Core

Do: Turn Compass off for an account and sign in as that owner.

Pass: Compass disappears for them.

☐ M5 **Compass Questions** Check

Do: Edit one question's wording.

Pass: The change shows on the next assessment. Past answers are untouched.

☐ M6 **Content and Site CMS** Check

Do: Edit a line in Site content.

Pass: It changes on the public site.

☐ M7 **Email Templates** Check

Do: Open the list.

Pass: Every email is listed, including Compass recommendation.

☐ M8 **AI Insights queue** Core

Do: Open the queue.

Pass: Reports await approval. Approving one makes it visible to the client.

☐ M9 **Support queue** Check

Do: Open it.

Pass: Tickets with status. A status change is saved.

☐ M10 **Audit log** Check

Do: Open it after a few changes.

Pass: Sensitive changes are listed with who and when.

☐ M11 **Raw feedback is not visible** Check

Do: Look for a way to read a client's raw responses.

Pass: There is none, except where the portal allows.

☐ M12 **Dev tools** Check

Do: Open Dev Data Tools on staging only.

Pass: Seed and 'Add launch demo layer' are present. Never press Wipe without a plan.

N. Operations and setup

These decide whether features work in real life.

☐ N1 **Platform Health: setup checklist** Core

Do: Open Admin > Platform Health.

Pass: Email, AI, scheduled-jobs secret, Stripe, webhook and site address all show 'Set'.

☐ N2 **Platform Health: scheduled jobs** Core

Do: Look at the job table.

Pass: All seven jobs show 'Running'. 'Never ran' means that job is not set up in Render.

☐ N3 **Email** Core

Do: Trigger any email (invite, alert).

Pass: It arrives from the verified domain.

☐ N4 **AI** Check

Do: Generate an insights report from Admin.

Pass: A draft appears in the queue (uses AI credit).

☐ N5 **Stripe webhook** Core

Do: Check Stripe's webhook log.

Pass: Deliveries show 200.

☐ N6 **Dev tools off in production** Core

Do: Check the production environment variables.

Pass: The dev data tools switch is not 'true'.

O. Mobile and tablet

☐ O1 **Dashboards on a phone** Core

Do: Open Overview, Cases and Raw Feedback on a phone.

Pass: No sideways scrolling and no cut-off boxes.

☐ O2 **Public form on a phone** Core

Do: Fill a survey on a phone.

Pass: Easy to tap, readable, submits.

☐ O3 **Admin on a phone** Check

Do: Open Accounts.

Pass: The table scrolls inside its own box.
